## DETAILED ACTION

### *Election/Restrictions*

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-27, drawn to a system for delivering personalized informational content to subscribers, classified in class 709, subclass 318.
  - II. Claims 28-51, drawn to a method for delivering personalized informational content to subscribers, classified in class 705, subclass 26.

The inventions are distinct, each from the other because of the following reasons:

Inventions I. and II. are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case Invention II. could be carried out, at least in part, by hand. For example the step or processing at least one service could be carried out by hand.

Because these inventions are distinct for the reasons given above, because the search required for Group I is not required for Group II, and because the inventions have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

During a telephone conversation with Brian Buroker (39,125) on 9/11/02 a provisional election was made with traverse to prosecute the invention of Invention I., claims 1-27. Affirmation of this election must be made by applicant in replying to this

Office action. Claims 28-51 are withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

***Claim Rejections - 35 USC § 103***

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-27 are rejected under 35 U.S.C. 103(a) as being unpatentable over Harrington (US Patent 5,895,454).

Harrington discloses the claimed system including subscription means for users to subscribe to one or more services on one or more channel databases (users register and have access to different services and products available); channel databases with informational data about a subject matter of interest for a plurality of subscribers (user query information); service processing means for processing a service for a plurality of subscribers using information from the channel databases (e.g. links user to relating products/services); output forwarding means for automatically forwarding output from

Art Unit: 3627

the services to subscriber output devices specified for that service (e.g. entertainment, radio, games) and revenue generating means for generating revenue as a result of the output of services to subscribers (administration software handles cost allocations for transactions, e.g. to administrator, telecommunications carrier or third party).

Harrington discloses the claimed device but is somewhat unclear regarding users "subscribing" to the services. It is notoriously old and well known in the art of providing services such as for entertainment (music, video, etc., such as "subscription" fees for cable t.v. service and special channels) and games to charge subscription fees to provide the service provider with income for a service provided over a period of time. It would have been obvious to one having ordinary skill in the art at the time the invention was made to provide the system of Harrington with the ability to charge "subscription" fees, in order to provide service providers with revenue. All other claimed limitations are either disclosed or inherent.
